USP General Chapter <800> Standards We Can Help!

Hazardous Drugs Handling in Healthcare Settings USP GC <800> Effective December 1, 2019

Compounding pharmacies, hospitals and other medical/pharmaceutical facilities have until December 1, 2019 to comply with the impending USP General Chapter <800> rules. Akro-Mils and Jamco products can help them with hazardous drug transport throughout their supply chain, from the drug's arrival, to it's final storage location.

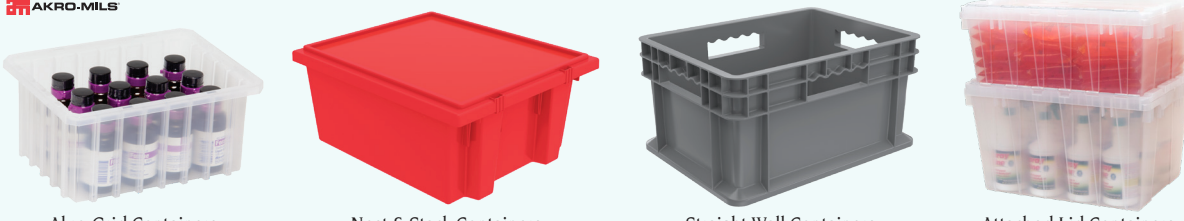

Harmful

Health Hazard

Flammable

USP General Chapter <800>	Description of the Problem	Product Solutions
<p>Gowns, head, hair, shoe covers, and two pairs of chemotherapy gloves are required for compounding sterile and nonsterile hazardous drugs. Two pairs of chemotherapy gloves are required for administering antineoplastic hazardous drugs. Gowns shown to resist permeability by hazardous drugs are required when administering injectable antineoplastic hazardous drugs.</p>	<p>There must be places to store and display PPE (personal protective equipment) such as gloves, gowns, eye and face protection or head, hair and shoe covers along with wipes or Closed System Drug-Transfer Devices (CSTD) so they are easily accessible to the staff.</p>	 <p>TiltView® Tilting Bins</p> <p>Super-Size AkroBins on Wire Shelving</p> <p>Akro-Tubs on Mobile Wire Shelving</p> <p>Stak-N-Store on Wire Shelving</p>
<p>Hazardous drugs must be transported in containers that minimize the risk of breakage or leakage.</p>	<p>In order to protect the staff, hazardous drugs must be secure from spilling or breaking as they are transported throughout the facility.</p>	 <p>Shock Absorbing Platform Truck</p> <p>Shock Absorbing 2 Shelf Cart</p> <p>3" Deep Lips Up 3 Shelf Cart</p> <p>Stainless Steel Lips Up 3 Shelf Cart</p> <p>3 Shelf Mesh Secured Cart</p>
<p>Packaging containers and materials must be selected to maintain physical integrity, stability, and sterility (if needed) of the hazardous drugs during transport. Packaging materials must protect the hazardous drug from damage, leakage, contamination, and degradation, while protecting healthcare workers who transport hazardous drugs.</p>	<p>Containers used in packaging hazardous drugs must secure and protect them from the surrounding environment.</p>	 <p>Akro-Grid Containers</p> <p>Nest & Stack Containers</p> <p>Straight Wall Containers</p> <p>Attached Lid Containers</p>
<p>Disposable or clean equipment for compounding (such as mortars and pestles, and spatulas) must be dedicated for use with hazardous drugs. This refers to equipment (or parts of equipment) that comes in direct contact with hazardous drugs.</p>	<p>There must be a separate set of equipment for compounding hazardous drugs and non-hazardous drugs, ex: mortars, pestles, spatulas, etc. Color coding storage areas with AkroBins will make it easy to differentiate between the two.</p>	 <p>AkroBin® Hanging & Stacking Bins</p> <p>AkroBins® with Louvered Panels</p>

Products for the safe storage of hazardous materials:

Hazardous materials must be stored to prevent spillage or breakage if the container falls. All Jamco Safety Cabinets have a 2" leak proof sill to contain spills or leaks.
